Data Security Solutions

Company Profile

Our Company

Data Security Solutions, S.A., leader in network security, was founded in 1998 with the purpose of providing the markets needs for the solutions and services necessary to prevent the vulnerability of networking systems to a maximum by any type of intruder, who can severely damage the competitiveness of a company.

Our exclusive group of clients includes banks, finance, insurance, entertainment, advertising, consumer goods, publishing, and government.

The Solutions offered by us, through our products and services cover a variety of network security issues, such as:

- *Advising for the establishment of security policies.*
- *Implementation and control of security policies.*
- *Risk evaluation and vulnerabilities detection on LAN's and WAN's.*
- *Token PIN "One Time Password" based access Solutions.*
- *Real time attacks detection, plus immediate response, protecting the information against external and internal threats. (Intruder Detection).*
- *Biometric user authentication (Local computers and entire domains)*
- *General Network Security (Virtual private networks - VPN).*
- *Windows and Linux based Firewalls (software and hardware)*
- *Web servers protection.*
- *Data encryption with Standard algorithms (DES, IDEA, RSA, DSS, Diffie- Hellman, etc.).*
- *Remote Control desktop administration.*
- *Software and hardware inventories, license usage control, software deployment, etc.*
- *Web applications development and more.*

Our Vision

Be the leader in network security in our region, integrate services and network security solutions with highly trained personnel with the last technology that can be offered to your business.

Our Mission

Help our customers to avoid unnecessary and expensive costs Ayudar a nuestros clientes a evitar el alto costo que involucra la pérdida de sus datos y la violación de las políticas de seguridad de su empresa.

Proven track record

Data Security Solutions has provided trusted and confidential service to a wide variety of industries, including financial services, manufacturing, warehousing and distribution, retail and service companies since 1998.

Helping key decision makers

The services and solutions provided by Data Security Solutions, S.A. are the best choice your organization because it will obtain and secure data availability, as well as the integrity and the levels of confidentiality in your daily operations and corporate well being. Data Security Solution's experience and expertise in the network security field is extremely helpful to key decision markers, helping decision makers, so they can choose the most suitable options; and will also aid the network engineers to implement the technologies smoothly.

Serving clients in their diverse endeavors

Data Security Solutions provides many services, such as updates, analysis, advice, and custom consulting to the world's leading industry suppliers in information, technology and communications. The other type of customers we provide these services include the foremost organizations in banking and finance, insurance, entertainment, advertising, consumer goods, publishing, and government.

Independent Advice

Data Security Solutions does not depend on any equipment manufacturers, distributors or installation companies, our solutions are the most appropriate because they are based on the experience we have obtained in the security field.

Outsourcing proves its value

As most companies try to remain competitive by outsourcing specialist advice, Data Security Solutions provides highly experienced security consultants to supply the best advice on the most appropriate level of security to their networks.

Helping organizations concentrate on their core business

Data Security Solutions can provide clients with the assurance that what they are buying will meet their requirements and will provide the expected level of security enabling them to concentrate on their core business.

Framework

Data Security Solutions helps organizations to design, implement, maintain and modify their security architecture. With our model, organizations can assess the information risk associated with business objectives, and then implement the 'right' level of trusted e-security. Our Lifecycle Security Model also helps organizations to understand what level of trust organizations require to create such a confident and reliable environment.
